

Implement the Dilation technique as a Morphological operation to dilate the foreground regions based on Open CV.

Code:

```
import cv2
import numpy as np
from google.colab.patches import cv2_imshow
from google.colab import files
# Upload image
uploaded = files.upload()
# Read uploaded image
img = cv2.imread(list(uploaded.keys())[0])
# Create kernel
kernel = np.ones((5,5), np.uint8)
# Apply dilation
dilated = cv2.dilate(img, kernel, iterations=1)
# Show original image
print("Original Image")
cv2_imshow(img)
# Show dilated image
print("Dilated Image")
cv2_imshow(dilated)
```

Output:
