

Implement the Black hat technique as a Morphological operation to dilate the foreground regions based on Open CV.

Code:

```
import cv2

import numpy as np

from google.colab.patches import cv2_imshow

from google.colab import files

# Upload image

uploaded = files.upload()

# Read image

img = cv2.imread(list(uploaded.keys())[0])

# Create kernel

kernel = np.ones((5,5), np.uint8)

# Apply Black Hat operation

blackhat = cv2.morphologyEx(img, cv2.MORPH_BLACKHAT, kernel)

# Show original image

print("Original Image")

cv2_imshow(img)

# Show Black Hat image

print("Black Hat Operation")

cv2_imshow(blackhat)
```

Output:
