

Recognize watch from the given image by general Object recognition using Open CV.

Code:

```
import cv2

from google.colab.patches import cv2_imshow

from google.colab import files

# Upload watch image
uploaded = files.upload()

# Read image
img = cv2.imread(list(uploaded.keys())[0])

# Convert to grayscale
gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

# Load classifier
watch_cascade = cv2.CascadeClassifier(
    cv2.data.haarcascades + "haarcascade_frontalface_default.xml"
)

# Detect object
objects = watch_cascade.detectMultiScale(gray, 1.1, 4)

# Draw rectangles
for (x, y, w, h) in objects:
    cv2.rectangle(img, (x, y), (x+w, y+h), (255, 0, 0), 2)

# Display result
print("Object Recognition")

cv2_imshow(img)
```

Output:
